Mesothelioma.net Provides Factual Information on Mesothelioma

Simon, Eddins & Greenstone, LLP Launches Web Site to Provide Improved Resources

Dallas, TX (PRWEB) July 14, 2009 – While an Internet search for the term “mesothelioma” returns millions of web sites, a large percentage of the sites are primarily for marketing purposes. Those who are victimized by mesothelioma are looking for consistent, factual and updated information on the disease. To fulfill this need, Simon, Eddins & Greenstone, LLP, a prominent trial law firm with proven results in representing victims of cancer caused from exposure to hazardous substances such as asbestos, has launched an improved version of the web site Mesothelioma.net.

The site’s improvements allow for continued growth in the areas of current mesothelioma information and news, and provide an expert channel of resources to help victims and families affected by mesothelioma asbestos cancer. The web site, which can be found at www.mesothelioma.net, aims to help patients and loved ones manage and organize information, treatment, and caregiving through multiple avenues including detailed information, blogs, and links to expert resources. Additionally, the site provides access to a helpful Mesothelioma Information Guide.

The screenshot shows the homepage of Mesothelioma.net. At the top, there is a navigation menu with links: Home, Mesothelioma, Asbestos, Mesothelioma Treatment, Legal Advice, Call Us Today, News, Blog, and Contact Us. Below the menu is a large banner image of a smiling couple. The banner text reads: "Mesothelioma.net Your Complete Mesothelioma Resource Center" and "1-877-275-6699 Call Now for Expert Advice". Below the banner, there are four main content boxes: "What is Mesothelioma?", "What is Asbestos?", "Mesothelioma Treatment", and "Getting Help". Each box contains a brief introductory paragraph and a "Read More" link. Below these boxes, there are two main content sections: "Mesothelioma" and "Treatment Options". The "Mesothelioma" section includes sub-sections for "Understanding mesothelioma", "Types of mesothelioma", "Risk factors", and "Signs and symptoms". The "Treatment Options" section includes sub-sections for "Choosing treatment", "Why surgery?", and "Mesothelioma treatment". On the right side of the page, there is a search bar and a "Free Mesothelioma Information Guide" download form. The form has fields for "First Name", "Last Name", "Phone", "Email", and "Zip", and a "Get Your Free Guide" button.

The guide covers details about the disease, treatment options and important resources available. As a bonus, the guide also includes a useful section to help organize all the vital information about the patient such as personal information and documents, medical and insurance information, financial and legal information, and more. Patient, loved ones and caregivers will all benefit from being informed and organized while dealing with Mesothelioma diagnosis.

The primary purpose of Mesothelioma.net is to guide victims and caregivers through their next steps and give potential options by providing authoritative information about mesothelioma. The web site information includes mesothelioma causes, treatments, clinical trials, the latest news, recent government rulings on mesothelioma claims, medical care options and legal perspective from experienced and trustworthy sources.
